Food & Drug Administration

After reading about the "affadictio[n] of food" food that is not labeled I couldn't believe that the public is uninformed about what they're doing to the food Americans eat & feed their children. We have a right to know what we're eating.

I understand the labeling is not self explanatory "electronic fastenagin" "self fastenagin" sounds good, it's misleading, it does not say the food might harm you & your family & has lost vitamins & nutrients:

The wording of the current radioactive disclosure should be revised to tell the exact truth & they should tell when they expire.

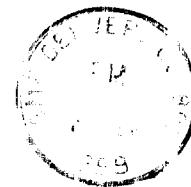

Sincerely

Barbara Linton
